## cool50-2 U40

090-008603-00502

- Cooling unit for water-cooled welding torches
- Water connections on the front and rear, for decompact machines (TDM).
- Modular design, tool-free assembly
- Excellent torch cooling and therefore cost savings on consumables thanks to the high-performance centrifugal pump
- External coolant water filling nozzle with filling level indicator
- We recommend using a **cooling unit with a reinforced pump** for an overall hose package length of 30 m and above, or for machines with an additional miniDrive of 20 m and above
